

# **EUROPEAN-AMERICAN EVANGELISTIC CRUSADES**

## **MY TAKE ON 9/11**

**By Pastor John S. Torell**

September 11, 2011

I was sickened when I woke up on Sunday September 11, 2011 and found that almost all television channels in the United States, including many Christian networks, devoted most of the day to commemorate the horrible event that took place ten years earlier in our nation.

Many years ago I read the book, "1984," by George Orwell, who was a British Jew that fought in the Spanish Civil War on the side of the socialists/communists. Coming back to England, he was depressed over the situation in the world, and as a Jew he had insight into the World Jewish leadership's aspiration to dominate the world one day under a one world government and a one world religion. He brought out that truth became a lie and the lie became the truth, and since the government and the media proclaimed it, it had to be truth and the people had to believe it or they would be taken to the ministry of love and forcefully convinced that what the government said is true.

### **STRUCTURAL INTEGRITY**

Any person with an engineering education knows that a high rise building with a steel structure that is hit on the top by an airplane will not compromise the integrity of the steel below it. On 9/11 the impact of the airplanes ignited the fuel and started a raging fire but that did not melt the steel beams. Most people have seen a demolition of building on television and they always collapse straight down into a pile of rubble. This is caused by explosive charges placed at key points in the structure which makes it implode and fall straight down and not damage any buildings around it. Not only did the twin towers collapse in this manner, but there was another building further away that had not been hit by an airplane that collapsed in the same fashion.

### **CRIME SCENE**

Nothing is moved at a crime scene until a thorough investigation has been done. There was no investigation of the rubble from the twin towers, instead, demolition workers were brought in and crews hauled away the steel structure around the clock where it ended up in China to be

melted and turned into new steel. Some pieces of the steel were kept in the U.S., so that it could be melted and reused in Navy ships as a memorial. But the bottom line is that by melting the steel beams and girders, there was no chance for an investigation to see if traces of thermite would be found in the debris.

The 9/11 murder of thousands of Americans was another “Pearl Harbor” that got us involved in wars of Afghanistan and Iraq. Which begs the question, who has benefited from these two wars? It certainly was not the American people.

### **PLEASE KEEP US GOING**

Finally, in order for this ministry to be able to be on the frontline and tell the truth, we need your help. We paid all the bills during the month of August but the great need at this time is the social security taxes for the pastor's. We need much prayer since it is becoming critical. When you send in your gift to our ministry for the month of September, would it be possible to give an extra gift and mark it for “taxes.” Money marked as such will be set aside so that we can make a payment to the IRS as soon as possible.
